

## wedi Top Line: even more freedom of design for bathrooms

**Emsdetten, November 14, 2023. There is an increased demand on modern bathroom design – in particular, for such solutions that are well-thought-out and easy to implement. "To cope with this demand, we will be launching further options for our ready-to-install Top design surfaces in the coming year," says Volkmar Harnischmacher, Head of Sales Channel Management & Marketing at wedi. There are already eight colours available in different textures. These include three recently launched designs with modern mineral material composition and integrated flakes made from 100% recycled material.**

"Well-thought-out comprehensive and efficient solutions that help to relieve the workload on site will become increasingly important for future-proof bathrooms," says Volkmar Harnischmacher, summarizing the current trend. System solutions including design surfaces are a pioneering approach: especially since wedi Top water resistant design surfaces are precisely matched to other wedi system components. They are preformed to fit wedi Fundo shower elements and wedi functional design elements – such as the wedi Sanoasa bench 3 or the wedi Sanwell niche for example. Large-format wedi Top Walls can be used for the cladding of walls and other surfaces in the bathroom. Equally perfect for new builds and refurbishment projects, they transform every bathroom into a modern oasis of well-being in no time at all.

### **Large-format and easy to install**

Only a few steps are required: thanks to their thickness of only 6mm they are not only easy to cut, but also lightweight allowing for a straightforward and easy installation. "Openings, drill holes and gradients are perfectly matched to corresponding wedi XPS elements," says Harnischmacher. The precisely fitting surfaces are simply bonded to the subsurface with wedi 610 adhesive and sealant. In contrast to traditional tiled surfaces, processors save much time since conventional work steps or long drying times are no longer required.

If you need a special format, you can cut wedi Top design surfaces yourself – all you need is a hand-held circular saw.

Further advantages of wedi Top design surfaces:

- Thanks to the antibacterial surface they are easy to maintain.
- They are durable, and the full-body colour allows for easy repair if surface damage occurs.
- Installation is quick and straightforward.
- The material is particularly light and can therefore be easily carried by just one person.

## About wedi

The wedi Group is a leading manufacturer of innovative system solutions for bathrooms and wet rooms. The company, founded in 1983 in Emsdetten, Westphalia, is known for its building boards with blue XPS core developed by the company founder Helmut Wedi. Today, the system provider employs more than 500 people and is active in over 50 countries. At its two manufacturing plants in Germany and the USA, wedi produces complete building systems and design-oriented components for durable and aesthetic bathrooms. The strategic focus is on a high degree of prefabrication and integrated technology to enable safe and easy installation. wedi is certified according to the environmental protection standard ISO 14001 and pursues a comprehensive sustainability strategy.
